

- 1) (Epic) As a social media user, I would like to be able to view multiple social media types on a single platform, so that I don't have to switch apps continuously. (rahevin) (1)
  - a) (Feature) As a User, I would like some form of indicator that informs me that this site is not frozen.
    - i) (PBI) As a User, I would like a loading screen so that I can determine if this site is frozen or still working
      - (1) (Tasks) Create a Loading Page
      - (2) Create a moving object, \*suggested, (glowing '1' in our logo)
      - (3) Display this page for approx 3 seconds, then direct to Login page.
  - b) As a User, I would like to create an account for this app, so that I may have my information saved for this platform
    - i) As a User, I would like a login/create login page so that I may setup and account with LandingPad
      - (1) Create a Login Page
      - (2) Create option that allows users to create accounts
      - (3) Create option that allows users to type in their credentials
    - ii) As a User, I would like to save important informations such as emails, so that I may recover my account if I forget the password/username
      - (1) Create a Personal Information page
      - (2) Retrieve Email, First/Last name, Birthday, Phone Number
      - (3) Create a textbox that the user may input something about them such as hobbies or description about themselves.
    - iii) As a User, I would like a "floating" menu bar that allows me to navigate through pages and information.
      - (1) Create a frozen/floating menu bar that is visible when scrolling through news feeds.
      - (2) Add a Home button(sends user to Personal Info page)
      - (3) Add a Settings button(Settings page will be created later)
      - (4) Create Left and Right arrows (will be explored and expanding on later)
  - c) As a User, I would like to sign in from my social media profiles, so that I may include them inside of LandingPad
    - i) As a User, I would like to be able to view my existing social media profiles in LandingPad, so that I have all my favorite sites on one platform
      - (1) Create a Social Media sign in page
      - (2) Create a button on their Personal Information page that links to this feature
      - (3) Learn API Documentation(We will start with just one API)
      - ~~(4) Display Facebook's Users personal page(create page to display this in) with basic information~~
- 2) As a Writer, I would like to be able to upload existing written documents to the writers features in LandingPad, so that I may have them saved on my personal account

- a) As a User, I would like to view my writer's account with LandingPad, so I know my information has been uploaded correctly
    - i) As a User, I would like to customize my writers account so that I stand out and feel different
      - (1) Allow writers to go under a pseudonym
      - (2) Create a textbox that allows writers to leave a brief summary of their works
  - b) As a Writer, I would like to be able to upload existing documents to my accounts, so that I may have them displayed.
    - i) As a User, I would like my file to retain the formatting of the original file so that I may download it from this site or keep everything organized.
      - (1) Save file type/document
      - (2) Allow user to browse their computer for document
      - (3) Research drag and drop, (implement option, if we can do it)
  - c) As a User, I would to be able to maintain and change my documents, so that I can improve existing work
    - i) As a User, I would like a feature that allows me to edit, delete my current documents, so that I may remove content or fix previous documents
      - (1) Create an edit button, that allows users to make changes
      - (2) Create a delete button
      - (3) Create a Genre dropdown box, that allows users to select the genre of writing they are uploading to their account
- 3) As a social media user, I would like to be able to perform most tasks on this single platform that I may do on the original app such as, (search friends, post, notifications, delete, upload, esc..), so that I'm more inclined to use this app. (rahevin) (1) ⇒ Related to above tho?
- a) As a social media user, I would like to maintain the other social medias options inside of LandingPad, so that I don't have to relearn how to use a social media website.
    - i) As a User, I would like an error message that informs me that a post/page cannot display, so that I know if something is broken on the page
      - (1) Create a Error message
      - (2) Create custom error message(Failed post, could load page, esc.. )
    - ii) As a User, I would like a page that displays my newsfeed in one place, so I don't have to keeps switching apps or tabs.
      - (1) Create a View Feed page(This page will be used for all API's)
      - (2) Display Facebook Feed on this page
      - (3) Create small menu bars on Posts, that allow users to delete or edit their own posts
    - iii) As a User, I would like a Menu bar that is familiar to the ones used in the Social Media sites I would like to include in LandingPad, So that it is user friendly.

- (1) Create a Multi Menu Bar(create a right/left arrow button, that then displays another's API Menu button, details later)
  - (2) Allow MenuBar to be displayed on the Feed page and each API's Personal page
  - (3) Customize each version of the Menu Bar according to each API(starting with Facebook, and writers platform)
- iv) As a User, I would like to be able to post to any platform I include, so that I have more controller where I want my posts to end up
  - (1) Create a small text box at the bottom of the Feed page
  - (2) Increase size of text box when click, so that user may view it easier
  - (3) Allow options in text box so that users can choose which platforms to post to
  - (4) Create a pop that asks the user permission before making the post
  - (5) Include a uploads photo, when writing a post
- 4) As a Writer I would like features that helps improve my writing such as spelling, grammar, and other options, so that I may improve as a writers
  - a) As a User, i would like an options that checks my spelling in my documents or posts, so that I can write more legibly.
    - i) As a writer, I would like an option that allows me to look up words definitions or similar words, therefore I can communicate with my audience better
      - (1) Create an algorithm that checks words in a document
      - (2) Create a Spell checker
      - (3) Include Dictionary API
  - b) As a Writer, I would like an option that checks my grammar, so that I can correct display words to a reader
    - i) As a User, I would like a button or an automated system that checks my grammar, so that I know which parts of my writings need work
      - (1) Include (Microsoft API) that scans the document
      - (2) Create a button that initiates the API
      - (3) Include constant scanning system so that users know immediately if something needs work.
- 5) As a Writer I would like to be able to organize, personalize how I display my written documents, so that viewers or myself can find documents easier.
  - a) As a Writer I would like to be able to move or create folders to put my written work inside, so that my documents are not scattered on this platform
    - i) As a User, I would like to be able to upload to folders inside my writer's account, so that all docs are organized.
      - (1) Create Folders for documents

- (2) Implement a browsing feature that allows the user to upload their documents to these folder(or implement click and drag)
  - ii) As a User, I would like to make or create folders that are private, so that I may work on documents without readers getting spoilers from my writings
    - (1) Create a button that allows folders to be hidden from all other accounts
- b) As a Writer I would like to be able to customize how readers respond to my documents I upload, so I may restrict bad responses
  - i) As a User, I would like to be able to turn on and off comments for my documents, so that I may control if I want feed back
    - (1) Create a Comments Toggle, that turns on/off commenting for a document
    - (2) Create a Comments section so that readers may leave a comment on authors writings
    - (3) Allow responders to delete/edit their own comments
    - (4) Create a deletion button for the author so that they may delete a comment
    - (5) Create a response box, so that authors may respond to readers
- 6) As a heavy social media user, I would like to be able to add multiple of the same type of media platforms in the same place, so that I don't have to keep login in and out of those medias
  - a) As a user, I would like to be able to login into multiple social media account and have the newsfeed displayed in one place, so that I may have everything in one place
    - i) As a facebook user, i would like to be able to login into multiple accounts so that I can maintain both my account and my business/other accounts
      - (1) Create multiple Facebook login accounts(first we see if we can do more than one, then we can find out the limitations for numbers of accounts login in; this is part of the login setting screen)
    - ii) As a Instagram user, I would like to be able to login into multiple accounts so that I can maintain both my personal account and my professional account
      - (1) Create multiple Instagram login accounts(first we see if we can do more than one, then we can find out the limitations for numbers of accounts login in; this is part of the login setting screen)
    - iii) As a Twitter user, I would like to be able to login into multiple accounts so that I can maintain both my personal account and my business account
      - (1) Create multiple twitter accounts logins (first we see if we can do more than one, then we can find out the limitations for numbers of accounts login in; this is part of the login setting screen)

- 7) You are allowed to use your real name, but you are not required to use a real name if you don't want to; pen names are 100% cool (1)(mentioned in 2)
- 8) The ability to mark your profile itself as private or public so that other users can only find you if you wish (1 or 2)
- 9) As a user, I need to see an error message if one of the social media panels doesn't load properly. (Aaron) (1)
- 10) Allow blog posts and links to references that aren't part of your writing portfolio (1)
- 11) Writing can be removed (1)
- 12) Image uploads for profile pics as well as the ability to upload an image that is connected to a specific piece of writing (1)
- 13) The ability to make edits to pieces (1)
- 14) Multi-level folders for organizing the writing on your profile (2)
- 15) Both preset (for example, simple things like "essay", "fantasy", "sonnet", etc.) and user-created tags (2)
- 16) Drag-and-drop file moving (2 or 3)
- 17) Automatic grouping of multiple chapters of a single story (2)
- 18) A difference between providing critique and leaving a comment: Critique should allow for inline comments and edit suggestions, while a comment is just a comment in a comment section (2)
- 19) Some sort of like or kudos button so a user can let the writer know they liked a piece without having to actually read a comment (2 or 3)
- 20) Can provide multiple names for your account if you want to let people know that you are known by different names at different places (2 or 3)
- 21) Writers can flag a comment for moderator review and possible removal ⇒ *possible danger with freedom of speech* (2 or 3)
- 22) Block specific users from leaving critique or comments (3)

- 23) If a writing is public, the request critique button will also add a link to the piece to a list of writings in need of feedback that users can view to find works to review (3)
- 24) A “request critique” button that will mark a piece as looking for feedback and send an automatic notification to followers and/or friends (3)
- 25) A follow button for a writer in general or for a specific folder that will notify followers when a new piece has been added (3)
- 26) When marking yourself as interested in providing feedback, you can specify the type and/or genres of writing you want to review and only receive notifications for writings with those tags (3)
- 27) As an advanced user, I would like to be able to decide to post to only some or to all of my accounts if I have multiple accounts or sub classifications for a single platform (i.e. a page or group run from your Facebook account, a secondary blog attached to your main Tumblr, etc.) so that I can target my posts to the correct audience. (Melissa) (3)
- 28) As a heavy social media user/or business, I would like an option that allows me to post to several platforms with a single post, so that I may save time.(rahevin) (3)
- 29) A difference between friends and followers: Friends are mutual and require a request and approval; friends will be granted access on things that are marked as viewable by friends but not the public. Following doesn't require approval, doesn't have to be mutual, and only grants access to pieces that are public. Basically, following just says that you want to be notified when there's something new from this person. Friends don't receive notifications about new pieces. If you are both a friend and a follower, you will get notifications for both new public stuff and new stuff that is only visible to friends. Finally, a friend is a connection to another writer, whereas you can choose to follow either everything a writer adds to their profile or you can follow only a specific folder that you want to know about updates to. (3)
- 30) The ability for a writer to grant access to a specific person on an individual basis even if that person didn't make a request (3)
- 31) Users can flag something as plagiarized if they have a link that provides evidence and the charge will be moderator reviewed (3)
- 32) The ability to turn critique off and on ⇒ maybe no need if driven by request? (3)
- 33) The ability to turn comments off and on (3)
- 34) The ability to mark the permissions of writing on an individual piece or folder basis (3)

- 35) The ability for readers to suggest additional tags for a piece that won't show up as one of its tags until the writer has approved them (3)
- 36) The ability to turn likes/kudos/whatever off and on (3)
- 37) The ability to turn off the request access button if the writer isn't interested in fielding requests (3)
- 38) Notifications can be dismissed if you want to delete them, or marked as read if you want to stop counting it as a new notification but don't want to delete it yet (4)
- 39) A request access button on pieces on private pieces or folders that will send a request requiring writer approval that will allow the user who made the request to access the piece or folder on approval (4)
- 40) Notifications for various things that can be viewed in a list on a separate page: New comments, kudos/likes, critique, access requests, new follows, friend requests, updates from writers/folders you are following, etc. (4)
- 41) As a non-heavy social media user, I would like a filter, that allows me to sort out either people or certain posts, so that I may save time and reduce my newsfeed.(rahevin) (4 or 5)
- 42) As a user, I would like the option to change which social media platforms I want displayed (IE: I don't like twitter (who really does - rahevin)). (Aaron) (4 or 5)
- 43) The ability to search for a writer (with a public profile) by name or to browse (public) writing based on tags so that a reader can find new things to read (4 or 5)
- 44) Allow highlighting or various markings in editor for comment and critique requests (4 or 5)
- 45) The ability to upload a piece of writing to our site and other writing sites at the same time (4 or 5)
- 46) Additionally, a user can mark themselves as someone who is interested in providing critique and they will specifically get a notification when a public request for critique is made (4 or 5)
- 47) As a user, I would like different options for displaying the content on the page or allow me to arrange the panes and change the colors how I want. (Aaron) (5)

- 48) As an advanced user, I would like to have multiple of the same social media visible (IE: My personal facebook page and my business facebook page) to edit both on the fly. (Aaron) (5)
- 49) As an advanced user, I would like to be able to specify how parts of a post are used so that the tags I use for organizational purposes on Tumblr can be included as hashtags or omitted entirely on platforms like Twitter and Facebook. (Melissa) (5)
- 50) As an advanced user, I would like to be able to have variations on a post when I make a batch post so that I can include more information on a platform like Facebook without going over the character limit on Twitter. (Melissa) (5)
- 51) As a social media user, I would like my options for displaying, posting, and the like to be customizable based on how I use social media so that I can choose to create a very customizable experience with more extensive options if I am an advanced/heavy user or a simpler and more streamlined interface that I won't find confusing if I'm a casual/light user. (Melissa) (5)
- 52) Connecting to accounts on other writing sites so a writer can verify that an account with cross-posted writing on another site actually belongs to them (5)
- 53) Support for additional languages (later feature) (5 or 6 way after)
- 54) Just very customizable permissions ⇒ related to others and permissions elaborate further of discover new permissions features
